## EDUCATION

### BACHELOR'S OF TECHNOLOGY

**COMPUTER SCIENCE AND ENGINEERING**

2019-2023

8.2 CGPA

---

## LANGUAGES

English ▬▬▬▬▬▬▬

## PROFILE

Enthusiastic and skilled MERN Stack Developer with a strong foundation in JavaScript, TypeScript, and ES6+. Currently working as a Front-End Developer at Bytelook Technologies, where I specialize in building responsive, scalable, and user-centric web applications. Actively looking for full-stack web development roles.

---

## WORK EXPERIENCE

### Front End Software Engineer

Bytelook Technologies

2024

- Developed and maintained user-friendly web applications using React.js, Next.js, and other front-end technologies.
- Collaborated with backend teams to integrate RESTful APIs and GraphQL endpoints.
- Implemented responsive designs and optimized web performance for better UX.
- Worked on implementing state management using Redux and context API for scalable applications.

---

## PROJECTS

### DevConnect 🐙

- Built the full-stack web app with a React.js frontend and Node.js backend, enabling users to interact with posts, likes, and comments.
- Enhanced scalability using MongoDB for database management and Redux for efficient state management

### E-Commerce Web App 🐙

- Developed a responsive eCommerce web application using React, Redux, Express.js, and MongoDB for seamless product browsing, shopping cart management, and order processing.
- Integrated Strapi for secure payment processing, supporting multiple payment methods to enhance user checkout experience.
- Implemented efficient backend APIs for real-time data synchronization, and optimized for scalability to handle high traffic and large product catalogs

### Movies AI 🐙

- Leveraged the Next.js App Router and React Server Components to enhance performance.
- Integrated Google Gemini API to deliver personalized movie suggestions through an AI chatbot, improving user engagement by 30%.
